There are six pieces. Three identical pieces and their three mirror images.

First select three identical pieces and assemble as shown in the picture on the right. Place them on a table or surface (with enough friction, such that they don't fall apart again).

Then select the remaining three pieces and assemble them into the mirror image of the first three pieces, and slide them together as shown (here is where some dexterity comes in handy!)

This puzzle is made of the following woods:  
Maple and Cherry
